ABOUT MANUFACTURER

PIPECO TANKS MALAYSIA an ISO : 90001 & 14001 certified company and WRAS approved products, that using the highest specifications and hygiene standards for manufacturing water tanks in the SMC Hotpress holding process. It offers tank sizes ranging from 1 M3 to 20,000 M3 and more for the direct and indirect water storage facilities around the world.

OUR MISSION

The GRP becomes the system of choice around the world to conserve water to the highest quality standards while addressing the short comings inherent to traditional storage systems such as plastic , concrete and steel tanks. The company's founding objective was to design and provide simple , innovative , globally certified water storage solution by assembling GRP sectional panels in modular and flexible patterns with uncompromising levels of quality and reliability to ensure preservation of the water to the highest standards of purity. A maintenance-free clean water storage system became the key driver for product development. From vision to reality , our clients are content with the supports in numerous fields such as state - of - the - art design , on - time delivery, and methodical installation. We focus our worldwide marketing efforts on storing portable water hygienically for extended periods and continue to innovate and expand our offerings to ensure that we meet our clients needs at every stage.
